

I received lungs as a gift

After I recovered from Corona, I continued having pain in my lungs. The doctor sent me for an x-ray. The technician told me clearly that although it is not her job to give a diagnosis, she sees from the x-ray that my lungs are badly damaged and she can't release me without a doctor first seeing me. She called the doctors in, and they explained to me that since my lungs are badly damaged they are sending me straight to the hospital to take a C.T. in order to determine if there is a blood clot in my lungs. Before I went for the C.T. I did blood work. The results were very high, which meant that my lungs were in danger! My family doctor said I need to go right away to the emergency room. When I got to the hospital, they immediately put me in the Corona department; they preferred that an experienced doctor take care of me. They sent me for another x-ray and blood work. After four hours the doctor came in and said to me "You can go home". We went home and my children didn't believe that we came back. My daughter told me that from the moment we left the house they were listening to stories on the Tznius Hotline. The whole family was alerted, and everyone took upon themselves difficult commitments for my health, and continued listening to the Tznius Hotline without a stop!!!! The story doesn't end there...In the morning the doctor called me and said, "I don't know what to tell you, but the x-ray that I saw in the morning and the x-ray from the hospital are not of the same person. Also, the blood work that you did before leaving to the hospital which showed very dangerous numbers and the blood

work that was done in the hospital are totally different". I went to the same doctor a week later and he told me he still doesn't believe what happened. The doctors were all astounded and didn't know how to digest what had happened all in a short period of four hours!!!! The x-ray technician called me up to apologize. She was certain that it was two different people involved, and she's not sure what happened. She thought maybe they was a problem with the x-ray machine. The doctor and the x-ray technician didn't know what happened, but I knew that it was in the merit of the Tznius Hotline and all the commitments my family took upon themselves while I was in the hospital.

We received a kidney as a gift

My father was on dialysis for three years. It's impossible to describe the difficulties the whole family experienced during that period. We davened that he would find a kidney donor as soon as possible and meanwhile three very difficult years passed by. Meanwhile, we got 40 ladies together to hook up to the Tznius Hotline in the merit of a refua for my friend's daughter. I was one of the 40 ladies. I listened, learned and grew. The salvation arrived after 18 days! All of a sudden, a kidney donor appeared in a totally unexpected manner. A few hours later the transplant was performed. Hashem showed us how much power there is in learning about Tznius. I also discovered that one who davens for a friend get answered first!

The stories in Hebrew are on extension 77.

Tznius hotline around the world

Modesty at work and at home

In all conversations between a male and female worker, one must be careful that there shouldn't be an atmosphere of lightheadedness such as joking, jesting etc....

Shmirat Halashon

Gossiping - words that cause hatred and dispute.
Loshon Hara is forbidden even when the story is totally true. For example: When friends from the past get together after many years, they usually talk about past friends and experiences. It is necessary to exercise utmost precaution not to speak loshon hara.
