

16

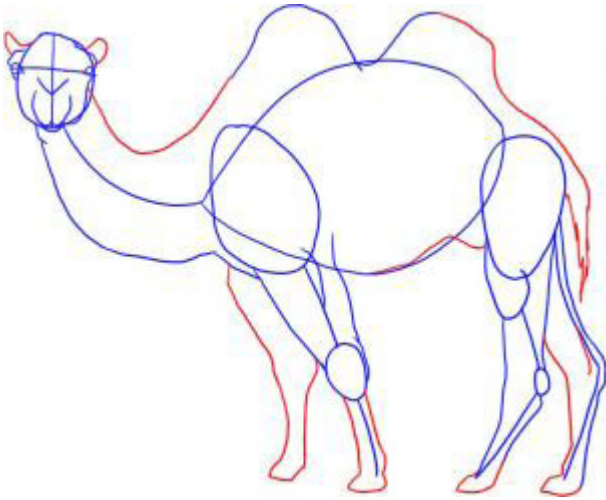

**STEP 1.**

In this first step you are going to draw the guidelines and shapes to create a frame for the camel. Start with a small circle for the head with facial guidelines sketched in. Now draw a big lemon sized shape for the body and two other circles for the front thigh and back upper thigh. Next you can draw in the guidelines for the legs and neck.

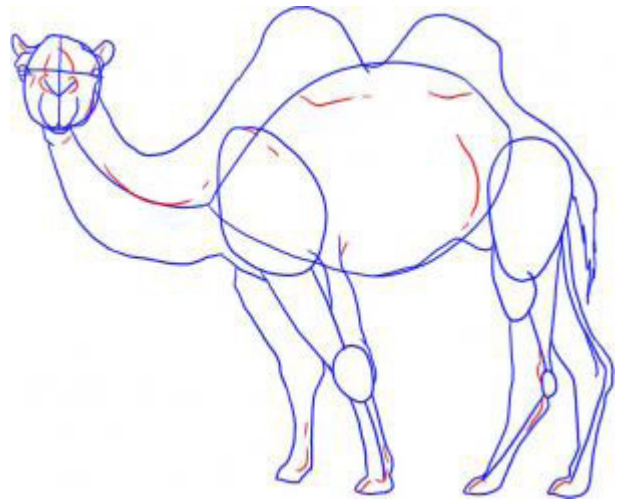

## STEP 2.

Now here in this step you will draw in the camels nose and large lip along with the big bulky eyes. Now you can start to draw out the shape of the camels long thick neck and front thigh of the leg. Now draw two simple humps as shown and then start drawing out the shape of the hind legs. This will complete this step.

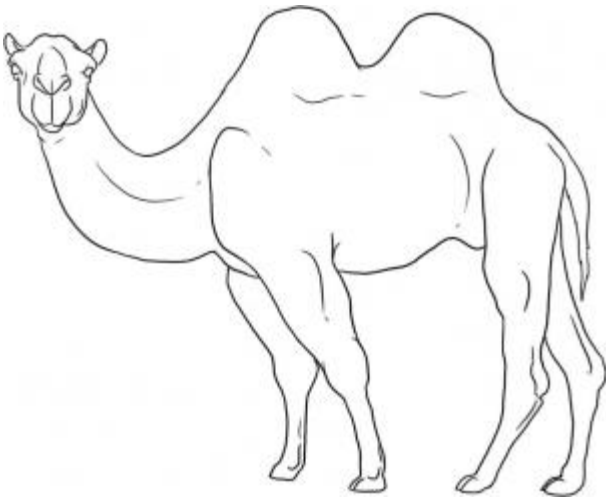

## STEP 3.

Start off this step by drawing out the two small ears and the back of the camels neck to finish off the thickness. Now draw the front leg and the rest of the bottom front leg. Now what you want to do is draw out the under belly. Now draw out the rest of the back hump and the behind along with the fuzzy tail.

## STEP 4.

In this step you will be detailing and drawing out the bone structure of the nose. Detail the neck and belly along with the legs and give the camel some toes. Now you are ready to erase all the guidelines and shapes to clean up your drawing.

**STEP 5.**

This is what your finished drawing of a camel should look like. Now you are ready to color in your camel. That will conclude this tutorial on how to draw a camel step by step.
