Image Gallery Quick Start Guide

Cover Page/Table of Content Links

To jump to a specific bundle item: click on a product name/link icon e.g., **Cosmetics Florals & Stationery** . (The product name has been included as part of the link so as to make the target larger meaning you don't just have to click on the green link icon). Once you navigate to a specific page, you can click the green 'Back to Top' button at the bottom right of each page.

Bookmarks Panel

We've included Bookmarks for those who prefer to use the Bookmarks Panel. The advantage of this panel is that one can jump from point to point without needing to return to the Cover Page/Table of Contents each time thus saving on the number of clicks required to navigate the image gallery.

- We've set the Bookmarks Panel to be visible by default but should you ever turn it off and want it back, just click on the blue bookmark icon on the left. These bookmarks may not automatically show for you when using Preview on Mac. To fix this, you can go to View > Table of Contents.
- A '+' sign next to the designer's name indicates that one or more levels of subfolders exist. To view the subfolders, just click on/off the '+' sign to expand/collapse a folder.

Search Functionality

You're able to use Acrobat's search functionality to search for specific words within this PDF (i.e., designers, filenames, and product names). This is a quick and handy way to find the specific items that you're looking for more details on.

- ACCESS: Edit > Find (CTRL + F) -or- Edit > Advanced search (Shift + CTRL + F)
- TIP: If you save all of your Image Gallery Guides to the same folder, the Advanced Search option will allow you to search both your current document and all PDF documents within a given folder i.e., you can search mutiple PDFs at the same time.

Edit the contents of a Smart Object

When you edit a Smart Object, the source content is opened in either Photoshop (if the content is raster data or a camera raw file) or the application that handles the placed format by default (for example, Adobe Illustrator or Adobe Acrobat). When you save changes to the source content, the edits appear in all linked instances of the Smart Object in the Photoshop document.

1. Select the Smart Object from the Layers panel, and do one of the following:

- Choose Layer > Smart Objects > Edit Contents.
- Double-click the Smart Objects thumbnail in the Layers panel.
- In the Properties panel, click Edit Contents.

2. Click OK to close the dialog box.

3. Make edits to the source content file, then choose File > Save.

Photoshop updates the Smart Object to reflect the changes you made. (If you don't see the changes, make the Photoshop document containing the Smart Object active).

All simply easy so just follow a few steps below:

1. Unzip archive and do not change folder structure;
2. Open **Place your design here.psd** [Photoshop CC];
3. Add Actions to your actions panel and run **Update Content.atn** [to resolve error with links path if they are];
4. Edit necessary smart objects [how to - Edit Smart Object.pdf] and save the file;
5. Run **Update all Content for ALL PSD.atn** and choose Source & Destination folders before press OK:

Source folder (folder with mock-ups) → **[01 Mock-ups];**
 Destination folder (mock-up'ed images) → **[Ready Presentation Images];**

All done, work finished, you have become faster and smarter!
Presentation images are located in chosen in Destination folder!

How to use it?

Add your design

1. To add your design just double click on the smart object layer and a new window opens.
2. Turn off the layer or create a new one and paste your design.
3. After you are finished hit save and close the window.
4. Photoshop updates your design in the main psd mockup.

Change the background

1. To change the color just double click on the Replace Color _ BG layer and change the color.
2. To add your background just create a new layer in to the BG folder and paste your texture.

Tips

1. Experiment with brightness, contrast and levels once you are done with the smart object editing.
2. Crop the image to achieve different looks.
3. Plays with Blend Mode: Try to use: Darken, Multiply, Linear Burn.
4. You can change opacity of Light Effects if you think the light is to strong or weak.

Submit Your Work

Submit your work presented on our mockups and be featured across our media channels. Get huge exposure.

YOUR MOCKUP
It's easy use for your design

Thank you for your purchase!

Quick Guide "Edit Smart-Objects"

- Open the mock-up you want to edit in Photoshop
- Look for the layer called "double click thumbnail to edit"
- Double click the layers thumbnail
- Click "OK" on the pop-up that opens
- Change the screen with your screenshot
- Saved by either clicking (windows: ctrl+s) or (mac: cmd+s)
- Screen will now be changed with your screenshot

And you're DONE! :)

Start creating awesome presentations and blow your clients minds with photorealistic results!

I'll be glad your comments to this product!

For questions and suggestions you can contact me on my email: usenko.yuriy@gmail.com

Best regards, Yuri
