## EXPERIENCE

### **Zed — Software developer, Ashdod**

2019 - PRESENT

Zed is consulting businesses and organizations: collecting of data and large data, running analysis, and implementing solutions with their clients.

I developed a financial CRM for Zed where you can manage clients, their financial transactions like invoices and payments, and search through all available data. This system also provides reports like P&L, overdue payments, clients roster and more.

The application is web-based, written mainly in C#, while the user front-end is written in html, css & JavaScript & selenium.

## NATIONAL SERVICE

### **Road Safety Instructor — Road Safety Center, Ashdod**

2013 - 2015

Planning and instructing school students as part of the road safety center actions to prevent dangerous situations on the road.

## EDUCATION

### **Mivhar Institute, Ashdod — Software Development**

2017 - 2019

2-year advanced program

Grade average **90+**
