## Solutions

Pardesia Software LTD, creates the security and enabling technologies as well as the interactive applications that allow operators to generate revenues by delivering digital content to TVs, set-top boxes (STBs), Digital Video Recorders (DVRs), PCs, mobile phones, portable media players (PMPs), removable media, and other devices.

End-to-end expertise around the world. Together they ensure the right combination of global and local resources to support the most demanding projects. With more than 75% of our workforce dedicated to ongoing R&D, NDS continues to create the next generation solutions to ensure that our customers remain market leaders.

around the world. Together they ensure the right combination of global and local resources to support the most demanding projects.
