# 1. Overview

The Transition Pack 2 is a set of 10 high quality video transitions for Premiere Pro.

- Impact Chroma Leaks *A beautiful dissolve with angled color streaks.*
- Impact Directional Blur *Angled blur transition with optional exposure that smears clips on and of the screen.*
- Impact Earthquake *Shaky transition with a slight color burn effect to add a dramatic touch*
- Impact Glass *Pieces of glass will distort clip A and B*
- Impact Radial Blur *Powerful circular blur transition as if clip A is rotated fast into clip B*
- Impact Rays *Colorful traveling rays wiping clip A to clip B*
- Impact TV Power *Turn your clip on or off like a TV being powered plugged or unplugged*
- Impact VHS Distortion *Old-school VHS like noise and patterns.*
- Impact Wipe *Smooth wipe with blur.  
Impacts both video and text.*
- Impact Zoom *Pulls clips towards or away from your screen.*

## 2. Installation instructions

- a.) Close Premiere Pro.
- b.) Double click the installation file:
  - “Transition Pack 2 V3.x.x.PKG” (for Mac OSX)
  - “Transition Pack 2 V3.x.x.EXE” (for Windows)
- c.) Follow the instructions as guided by the installer.

Note to Premiere Pro CC users:

When do you need to install the “Backwards compatibility package”?

*When you have projects that contain transitions from previous versions (version 1.x.x) and want to open those projects, you will need to install the Backwards compatibility package. Premiere Pro CC will warn you about missing transitions if you have not installed this package.*

- d.) Please activate your copy.

Read section 3: Activate your copy.

## 3. Activate your copy

After installation the transitions will be available in Premiere Pro under  
Effects > Video Transitions > FilmImpact.net TP2

- a.) Select one transition of the Transition Pack 2 and apply it to one of your clips in your sequence timeline.
- b.) Select the transition in the timeline
- c.) Press the 'Activate' button below the parameter controls in the Effect Controls tab.
- d.) You are now opted to either Evaluate, Activate or Buy.  
Select: Activate
- e.) Locate the license file you have been sent

When you purchased your copy you have been sent an email containing several links. One of them is a link to a .KEY file. Save it to a known location (e.g. your desktop).  
Then select this file and click 'OK' or 'Select'

- f.) Congratulations, you have now activated your copy!
- g.) Please restart Premiere Pro

## 4. Updates

Our V3 plug-ins can show version information and check for updates.

Once you've selected a transition, you can push the small 'setup' button in the Effects Controls Tab like indicated below:

You can also visit our update portal to check for updates

[www.filmimpact.net/updates](http://www.filmimpact.net/updates)

## 5. Trouble shooting FAQ

**Question:**

I've installed the plugins correctly, but the transitions are not showing up in Premiere Pro.

**Answer:**

You might want to reset the plugin loading cache

- 1.) Close Premiere Pro
- 2.) Launch Premiere Pro while holding the shift key  
(This will take a little more time as Premiere Pro rebuilds the plugin cache)

If you are using Premiere Pro CC, please make sure you are running Premiere Pro CC Version 7.1.0 or higher. This is the minimum requirement for our V3 products.

---

**Question:**

The watermark is still visible after activating the Transition Pack 1.

**Answer:**

It may still seem as though the demo version has been installed if you have made some preview renders using the demo version.

What basically happened is that the demo watermark has been rendered and Premiere Pro is still showing these render files.

The solution here is quite simple:

Just delete the render files (Menu > Sequence > Delete render files)

---
